|                            |                                                                                               |
|----------------------------|-----------------------------------------------------------------------------------------------|
| <b>External dimensions</b> | 8 x 7 m                                                                                       |
| <b>Eaves height</b>        | 220 cm                                                                                        |
| <b>Ridge height</b>        | 312 cm                                                                                        |
| <b>Storeys</b>             | 1                                                                                             |
| <b>Base</b>                | External footprint 8 x 7 m. Base type and size are confirmed for the specific model and site. |

## Structure

|                                   |                                                                                                                 |
|-----------------------------------|-----------------------------------------------------------------------------------------------------------------|
| <b>Wall build-up</b>              | 44-100-44 mm: 44 mm outer skin, 100 mm cavity, 44 mm inner skin. 188 mm total wall thickness.                   |
| <b>Other wall options</b>         | The other approved twin-skin build-ups and solid wall profiles can be specified to suit the project and budget. |
| <b>Construction</b>               | Interlocking tongue and groove joints                                                                           |
| <b>Timber</b>                     | Northern European timber                                                                                        |
| <b>Storm brace and anchor set</b> | Included                                                                                                        |

## Floor

|                      |                         |
|----------------------|-------------------------|
| <b>Floor bearers</b> | Impregnated as standard |
| <b>Floor boards</b>  | 28 mm                   |

## Roof

|                    |                                |
|--------------------|--------------------------------|
| <b>Roof boards</b> | 19 mm tongue and groove boards |
|--------------------|--------------------------------|

## Doors and windows

|                |                                                 |
|----------------|-------------------------------------------------|
| <b>Doors</b>   | Single glazed                                   |
| <b>Windows</b> | Double-Glazed Timber Joinery, Insulated Profile |

## Scope of these figures

|                     |                                                                                                                                                                                                       |
|---------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Insulation</b>   | The 100 mm cavity is the space insulation occupies. Eurodita supplies the structure prepared for insulation, not the insulation material, so the cavity dimension is not an insulation specification. |
| <b>Availability</b> | Build-up availability and suitability for a given project and destination are confirmed per order.                                                                                                    |
| <b>Performance</b>  | These dimensions establish no thermal, fire, structural or certification performance.                                                                                                                 |
